Casobe & Co

Information Security: Governance: Assurance

Capability Statement

- The time to act is now – don't wait until you are attacked
- We are ready to help you shape your security posture for the future
- You need a guide with experience of known and unknown threats
- Take your next steps with us.

Our Benefits

Casobe is bespoke with its clientele solutions. Our Principles have pioneered techniques which are at the forefront of our industry, and practiced globally. We understand risk, its application to technology and relevant measures of support to mitigate these. In delivering our services, we understand our clients requirements and continually review the service delivery to effect best practices and market changes. From engaging our services to reduce cyber risk on critical infrastructure in hostile environments, to assisting with IT Strategy and development for a government executive agency, our partnered and collaborated approach will aim to ensure support from all project stakeholders.

Client Comments

"You resolved our issue with tact and diplomacy and created a bridge between our technical team and legal counsel. This has saved us considerable finance, great heart ache and we now have a secure and highly effective solution"

"The professionalism and integrity of the people engaged were second to none. I was able to understand our own challenges, and they worked with us tirelessly for the most viable commercial resolution"

"Time and time again, they have proved dependable and were always willing to assist without I told you so. I am now convinced that being pro-active for us, is better than reactive."
